MAXI-PROportioner

The MAXI-PROportioner system is designed for irrigation systems with wet wells. The system provides convenience for using Aqua Aid and Aquifer chemistry without mixing. The MAXI-PROportioner system utilizes pellet formulations designed to make watering more effective and longer lasting. The rate at which an individual pellet will dissolve is determined by water temperature, quantity and pressure.

Aquifer®

SOIL SURFACTANT PELLETT

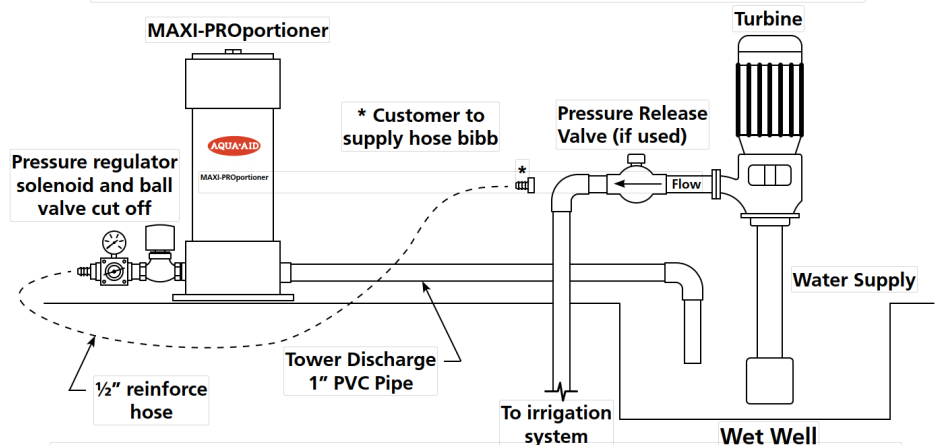

- 100% active ingredients
- Provides uniform hydration
- Reduces hand watering
- Weight: 3,4 Kg
- up to 5 Ha per pellet

Aqua-Aid®

ALL PURPOSE WATERING PELLETT

- 100% active ingredients
- Increase water penetration
- Provides uniform wetting
- Weight 3.4 Kg
- up to 5 Ha per pellet

AQUA-AID MAXI-PROPORTIONER INSTALLATION

Instructions:

1. Screw the pressure regulator to the nozzle side of the MAXI-PROportioner
2. Run 1" PVC pipe from MAXI-PROportioner to within approximately one foot from the bottom of the wet well.
3. Tap irrigation line and install customer supplied hose bibb and attached 1/2" reinforced hose from pressure regulator / solenoid valve to irrigation line.
4. Plug the timer into power source then plug power transformer into timer. A dedicated electrical outlet may need to be installed if the MAXI-PROportioner is located too far from existing outlets.
