# VerdeCal F

## Enhanced Liquid Calcium

**VerdeCal F** is an enhanced liquid calcium product that can be applied as a foliar product on sports turf. **VerdeCal F** is ideally used as a product for plant protection in the golf and sports turf. **Verdecal F** increases cell wall strength and contains added humic acids aiding in nutrient uptake. Plant essential nutrients like Magnesium and Iron are also present in **VerdeCal F**, in low percentages.

### PRODUCT DETAILS

- Promotes the health and sustainability of the grass plant
- Improves the formation of chlorophyll
- Increases drought resistance because of enhanced root development
- Contains important nutrients
- Added humic acid for more efficient nutrient uptake
- Supports a large number of metabolic processes
- Other applied fertilisers become more efficient
- Strengthens the cell walls

### DIRECTIONS FOR USE

For sports turf application use 10 - 20 L / Ha in 400 L water per hectare per application. Apply in 14 - 30 day intervals.

When used on soils with low organic matter and/or low natural mineral content in the soil, more frequent application and/or higher application rates per Ha are recommended. For these applications, please ask your distributor for the correct application rate.

Available in boxes of 10 L packaging. Bigger packaging available upon request. Please check availability with your distributor.

**COUNTRY OF ORIGIN:** UNITED KINGDOM

## VERDE-CAL® F

### COMPOSITION:

CalciumOxide(CaO).....	18,0%
HumicAcids.....	5,0%
Magnesium (Mg).....	>0,5%
Iron(Fe).....	>0,5%
